

Office of the Sark Electricity Price Control Commissioner

Notice

6th December, 2018

Yesterday, I became aware that SEL has charged its customers a price of 66p/kWh for electricity consumed during November, 2018.

This is inconsistent with the agreement that I reached with SEL for the purpose of disposing of its recent appeal. The matter has been raised with SEL and I await the Company's response.

Regarding the points made by SEL in the letter accompanying your electricity invoice, I look forward to addressing them, once negotiations over the possible purchase of SEL have been concluded.

Anthony White

Commissioner
